

October 2017 Update

ESL5

— Electronic Safe Lock —

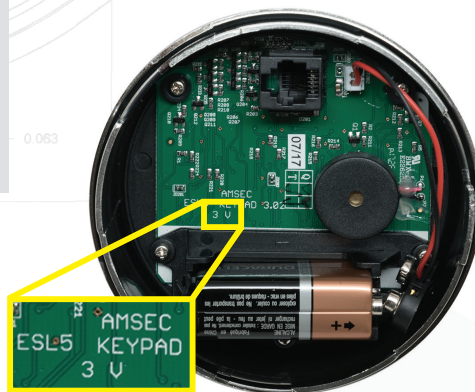

IMPORTANT NOTE

The microprocessor previously used in Amsec's ESL5 lock is no longer available. The circuitry has been redesigned with a new lower-voltage microprocessor. This change will lower the lock's current draw and improve battery life. It is important to note that the new 3.3-volt locks and keypads are not interchangeable with the old 5.0-volt parts. Caution must be exercised when ordering replacement keypads. The notes below outline how to tell the difference between the old 5.0-volt components and the new 3.3-volt parts.

NEW 3.3-VOLT ESL5

3.3v Replacement Keypads

Description	Part #	Retail
Chrome	0635368	\$60.00
Black	0635367	\$60.00
Black Nickel	0635369	\$60.00

LOCK - Serial number has 8 digits and begins with EL. Example: EL20000001

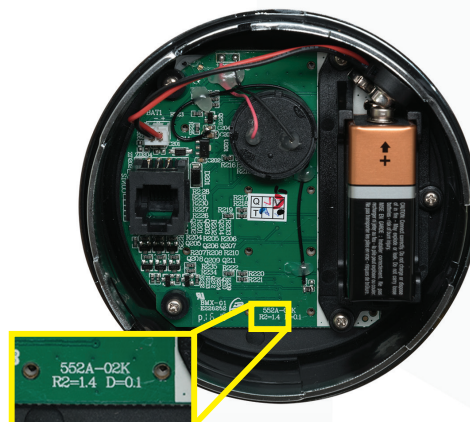

KEYPAD - "3 V" is visible on the circuit board (see photo above)

BASE - EL serial number listed along with replacement keypad part number label

OLD 5.0-VOLT ESL5

5.0v Replacement Keypads

Description	Part #	Retail
Chrome	0615952-CHR	\$60.00
Black	0615952-BLK	\$60.00
Black Nickel	0615952-BNI	\$60.00

LOCK - Serial number has 6 digits and begins with either EL5 or EL7. Example: EL500001 or EL700001

KEYPAD - "R2=1.4" is visible on the circuit board (see photo above)

BASE - EL5 or EL7 serial number listed. May or may not have replacement keypad part number label

October 2017 Update

ESL5

Electronic Safe Lock

Replaces most mechanical combination locks

- Easy installation and operation
- Each key individually backlit
- Factory Reset Combination for resolving lost combinations without requiring expensive service calls
- Electronics are encapsulated within the lock and are sealed to prevent possible moisture-related failures
- Cable fits through a ½" spindle hole without cutting and re-crimping connector
- Beep and flash from every keystroke gives maximum feedback to the user
- Lock can be programmed to silence the beep in stealth mode
- 15-Minute Penalty Lockout after four incorrect entries protects against manipulation attempts
- Swingbolt reversible lock design for right- or left-handed installation
- Lock "auto-locks" when boltwork is thrown to prevent safes from being left open
- One 9-volt battery can be easily replaced in the keypad housing
- U.L. Type 1 listed

Color Option

- Black Nickel
- Black Rubberized
- Chrome

Black Rubberized
