

Installing the CR123A Batteries in the LKMLED

Twist the bottom cap on the LKMLED light where the on/off button is located.

Remove the battery tray that holds the AAA batteries.

Insert the black plastic spacer supplied with the light.

Once the spacer is in place, insert TWO CR123A batteries with the positive ends facing towards the head of the LKMLED.

Replace the bottom cap by twisting until tight.

Press your on/off button to reveal the brighter lumens of the CR123A batteries.

- 260 Lumens using AAA batteries
- 320 Lumens using the CR123A batteries
