

American Owned

The Sargent & Greenleaf® 2740 High-Security Lock delivers the kind of technical advantage that can only come from . . .

American Ingenuity

GSA has approved the S&G 2740.

When you make your own direct comparison with the Kaba Mas X-09,
we think you'll approve of the S&G 2740 as well.

Finally, there's an alternative to the foreign owned Kaba Mas X-09.

For decades, facilities security officers (FSOs) have been limited to only one GSA approved, high-security combination lock that met the stringent lock mandates of Federal Specification FF-L-2740A. But today, thanks to a team of innovative American engineers, there's a choice. The Sargent & Greenleaf Model 2740 has passed all the rigorous tests spelled out in Federal Specification FF-L-2740A, and has been placed on the Federal Qualified Products List, having been deemed appropriate for safes, security files, vault doors, and similar items; and intended for the protection of national security information.

By eliminating the need for cables outside the safe, the S&G 2740 represents a significant step forward in both innovation and security. Engineered and manufactured to meet the highest security standards of the U.S. Government, the S&G 2740 provides instant, reliable power up, replacing the antiquated "dial generated" power source used on the Swiss-owned Kaba® Mas X-09™.

And because the S&G 2740 is powered by common lithium power cells, with a projected life of 10+ years, you simply replace the batteries to extend the lock's life, rather than replace the entire mechanism. S&G will even provide the batteries for free. The result is both enhanced long-term security and lower cost of ownership.

The logo for the General Services Administration (GSA), consisting of the letters "GSA" in white on a blue square background.

Sargent & Greenleaf has set the bar for quality, value and technical innovation for over 150 years.

A domestic provider for domestic security.

Located in Nicholasville, Kentucky, Sargent & Greenleaf (S&G), now a subsidiary of Stanley Black & Decker, has been protecting the assets of banks, businesses and governments since 1857. As an American owned company, we take great pride assisting U.S. Government agencies, the military, and their contractors in their efforts to protect classified materials and maintain the highest level of domestic security. The S&G 2740 has been designed to deliver the performance security officers demand.

- ⊕ Meets Federal Specification FF-L-2740A
- ⊕ GSA approved alternative to the Kaba® Mas X-09™
- ⊕ GSA approved for use on new and existing GSA containers
- ⊕ Easier installation: fewer parts, no delicate ribbon cables
- ⊕ Enhanced security: the 2740 design eliminates electronics outside the container
- ⊕ High reliability: precision motor and drivetrain technology
- ⊕ Two year warranty
- ⊕ Easy read: high contrast, bright white laser etched dial number markings
- ⊕ Instant power up: no need to dial multiple times to power
- ⊕ Extra long-life power cell technology, with a projected battery life of 10+ years means years of service and easy maintenance
- ⊕ Spy-Proof® dial: delivers operator-only visibility
- ⊕ Rugged construction: lock withstands 600 pounds of end and side load force
- ⊕ Around-the-clock technical support

Feature-for-feature the S&G 2740 blends classic design and cutting edge technology to deliver outstanding performance!

	Kaba Mas X-09	S&G 2740
Specification Qualification	Meets Federal Specification FF-L-2740A	Meets Federal Specification FF-L-2740A
Power Source	Self-powered with energy diminishing super cap components	Battery-powered, using commonly-available, lithium batteries
Power Generation	Spin dial for power	Powers up instantly
Replacement	Replace lock cover or entire lock system	Replace only batteries
Installation	Difficult: Requires delicate ribbon cables to run from outside the container to lock inside container	Simple: No external cables required
Company Ownership	Foreign – not American ownership	American owned
Display	Polarized LCD screen: hard to read in dimly-lit areas	Easy-to-read, high contrast, laser-etched numerals and index marks
Warning System	Provides no warning prior to lock failure	100 low battery indications, plus available battery back up to power lock
Warranty	One year warranty	Two year warranty
Service		Backed by S&G support: 24/7 live service support
